# Public Works Open House

---

Friday, May 22, 2009  
10:00 AM to 3:00 PM

- Curious how we keep things running with underground pipes over 60 years old?
- Need information on toilet or clothes washer rebates?
- Interested in past construction projects and future plans to renew our aging infrastructure?

*Stop by the Public Works Open House to ask these questions and more.*

## City Hall, 567 El Camino Real

Talk to staff and view displays, handouts, construction drawings, a timeline of recent construction projects, and other information describing how our public infrastructure works.

## Operations and Maintenance Yard, 225 Huntington Avenue

Visit the place where the work gets dirty. See the tools and equipment the water and wastewater crews use to keep the faucets running and the toilets flushing.

## 1:00 PM Bus Tour of a Work Site and Pumping Station

Be at the Operations and Maintenance Yard (corner of Huntington and San Felipe) at 1 PM to hop on a bus and tour an active construction site and see an operational pumping station.
